TECHNICAL SKILLS

Languages:
Python, JavaScript, MySQL, HTML, CSS, C, C++, x86-64 Assembly
Frameworks & Libraries:
React, Selenium, BeautifulSoup, Scikit-Learn, NumPy, Pandas, TailwindCSS
Tools & Platforms:
Git, GitHub, Twilio API, REST APIs, Linux/Unix, VS Code, Node.js
Other:
UI/UX Accessibility Practices, Responsive Web Design, API Integration, Technical Documentation, Data Organization, Debugging

TECHNICAL PROJECTS

Job Posting Web-Scraper & SMS Alert System **Jan 2026**
Python · Selenium · BeautifulSoup · Twilio SMS · Automation
- Built an automated monitoring system using Python and Selenium to collect and structure data from web portals.
- Implemented robust scraping workflows including retries, timeouts, and structured parsing to ensure reliable extraction from dynamic pages.
- Automated notifications using Twilio SMS to deliver timely updates, reducing manual monitoring of job portals by 90%+.

Alzheimer's Detection using Machine Learning **Aug 2025**
Python · NumPy · Pandas · Scikit-Learn · Data Visualization
- Built an end-to-end ML pipeline to classify Alzheimer's disease from cognitive/clinical features with data cleaning, feature engineering, model training, and evaluation.
- Experimented with multiple algorithms (Logistic Regression, Random Forest, SVM) and optimized hyperparameters to improve classification performance.
- Analyzed structured datasets and documented model insights using visualizations to support interpretation of diagnostic patterns.

PenguinSteps — Accessibility-First Event Companion App **May 2025**
React · JavaScript · UI/UX · Accessibility Design
Awarded "Most Accessible" at Sparkjam Designathon
- Co-designed an event and communication app, prioritizing neurodiverse and accessibility-focused user needs (high contrast, motion-safe UI, screen-reader support).
- Developed and refined React components with a focus on accessibility and maintainable UI design.
- Recognized for delivering a highly usable, accessibility-driven product experience.

WORK EXPERIENCE

Assistant Teacher, Jul 2025 – Aug 2025
Miller Park Elementary School – Coquitlam, BC
- Designed leveled math exercises aligned to student ability, increasing classroom engagement through differentiated strategies.
- Supported classroom management and inclusive routines, reinforcing positive learning behaviors.

Assistant Teacher, Apr 2024 – Present
Kumon Canada – New Westminster, BC
- Developed individualized learning plans by analyzing weekly performance data, accelerating student progression through targeted, level-appropriate practice sets.
- Maintained student performance and attendance records, ensuring accurate and consistent data tracking.

EDUCATION

Bachelor of Computer Science **Expected Apr 2027**
Simon Fraser University, Burnaby, BC

High School Diploma: **Apr 2023**
India International School in Japan, Tokyo, Japan
Honor Roll
